

Modul Oil

Made in Germany

Modul Fatty Cup grease is water-resistant hydrated calcium grease is to be used for greasing flexible and sliding joints of different machines and mechanisms working at normal conditions

Specifications:

NLGI 2
DIN K2C-25

Temperature range up - 30... to +65 °C

Specifications

Properties	Units	Method	Typical value
Appearance, Color			From light brown to brown
Drop point	°C	ASTM D566	78
Penetration @25°C	mm/10	ASTM D217	230-290
Shear strength @50°C	Pa		196
Effective Viscosity: @0°C	Pa*s	ASTMD1092	250

Basis oil:

Mixing of mineral base oils

Custom code: 2710 9900

The above figures are those relating to normal manufacturing tolerances and do not constitute a specification
